

Saw Blades, Rasps and Reamers for Bone Surgery

GOMINA
SWISS QUALITY

Innovative Solutions

Gomina has been producing saw blades for medical technology for more than 10 years. From the initial blank to the packaged finished product, Gomina carries out all processing steps in-house in compliance with the Swiss Quality label. Amongst our standard product range are oscillating saw blades with various teeth shapes and geometries in all sizes and arrangements as well as compass saws with single or double-sided blades. Based on our decades of experience in abrasive technology, we also produce sophisticated reamers and rasps in various shapes, abrasive patterns and surface roughnesses.

Alongside our standard product range, we continuously develop in close cooperation with our customers innovative and trendsetting solutions for the benefit of patients.
